## About Medisize

Medisize manufactures drug delivery devices, primary pharmaceutical packaging, medical and diagnostic devices, and airway management products. The company's drive and innovation have made it a leading contract development and manufacturing partner in the healthcare market. Medisize has expertise in product design, in-house tool making, moulding, welding, assembly, packaging and sterilisation. Besides this, Medisize is an innovative supplier of airway management products. Products for filtration and humidification are developed and manufactured under the brand name Medisize.
